INDUSTRY

This range of tiles was developed specially to be able to cope even with high loads from machines in the long term. 15 mm thick, Industry is extremely hard-wearing. Additional elements such as rounded baseboards and angling allow for even difficult areas to be tiled in full and thus for optimum cleaning. As well as complying with high mechanical and hygienic standards, with its optional anti-slip surface, Industry meets demanding safety requirements, for example, in contact with greases and oils. In accordance with the demands of various anti-slip classes, optional reliefs allow for the necessary skid resistance and work safety.

Diese Fliesenserie wurde mit dem Anspruch entwickelt, selbst starken mechanischen Belastungen dauerhaft gewachsen zu sein. Mit einer Dicke von 15 mm ist Industry enorm strapazierfähig. Zusatzelemente wie abgerundete Fußleisten und Winkel sorgen für vollständige Verfliesbarkeit und optimale Reinigungsmöglichkeiten. Neben hohen mechanischen und hygienischen Anforderungen erfüllt Industry in der Oberflächenvariante „antislip“ auch anspruchsvolle Sicherheitsstandards zum Beispiel beim Umgang mit Schmierstoffen und Ölen. Gemäß den Bestimmungen diverser Rutschhemmungsklassen bieten optionale Reliefs entsprechende Rutschfestigkeit und Arbeitssicherheit.
